Our Learning Environment

A Place to Grow offers a nature-based learning environment in a warm, loving, and community-focused atmosphere. Our school is set on 28 wooded acres along the Oyster River and is co-located with Harmony Homes Assisted Living Facility. Our location allows us the flexibility to explore the curriculum while in nature and the ability to share experiences with our elders. A monthly theme-based curriculum is used to guide the daily activities throughout the center. Curriculum and learning opportunities for children are designed to meet the NH Early Learning Guidelines.

A Place to Grow offers my child the opportunity to learn in nature, but it's so much more than that! My child was well prepared for Kindergarten.

Meet Ms. Kristine

Ms. Kristine's 38 year career in ECE has shown her that a quality, caring, supportive environment for our youngest learners is key to establishing a love of exploration, learning, and socialization. Ms. Kristine loves bringing music, arts, and literacy to all developmental stages everyday and is very excited to incorporate A Place to Grow 's nature based curriculum in her first business venture. Ms. Kristine feels very fortunate that the children have the unique opportunity to connect their emotional learning to shared experiences with the residents at Harmony Homes facility. In her spare time, Ms. Kristine loves live music, travel, theater, keeping up with her very busy granddaughters and stays active with her adventurous group of friends.

Tuition

AFFORDABILITY

Harmony Homes feels strongly about providing affordable on-site childcare for its employees and volunteers. Tuition rates will be set each July and will be based on the NH Childcare Scholarship Tuition Rates.

NH Child Care Scholarships are accepted.
